

配備精良 技術先進 Professional Equipment

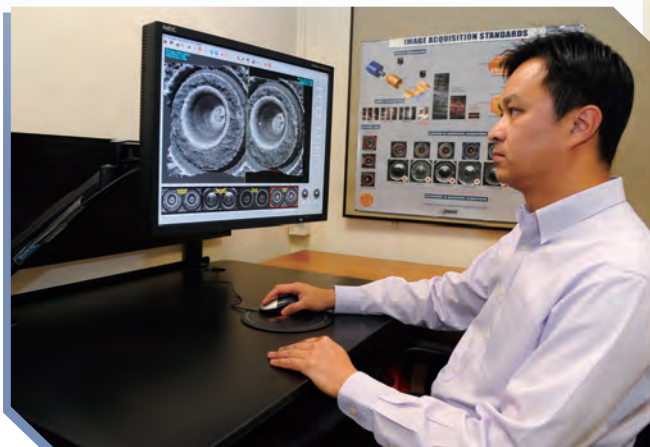

全新Delta獨眼龍拆彈機械車配有無線控制系統，使警務人員可處身安全位置拆除土製炸彈。

Delta Cyclop, a new robot equipped with a radio-controlled system, allows officers to dispose of an improvised explosive device from a place of safety.

整合式彈道辨識系統是用作採集及分析已發射子彈頭和彈殼的痕跡，其最新的三維數碼影像技術，加強警隊對槍械和子彈的鑑定能力。

Integrated Ballistics Identification System is designed to isolate and analyse individual characteristics found on the surface of fired bullets and cartridge cases. Its latest 3-D digital imaging technology enhances the Force's capability to identify firearms and ammunition.

全新防爆衣（型號MK 9）重逾34公斤，並配備可調節空氣流通和照明系統的控制板，為進行爆炸品處理行動的警務人員提供保護。

The new bomb suit (model MK 9) weighs over 34 kilogrammes and is equipped with a control panel to adjust ventilation and lighting, providing protection for officers that conduct bomb disposal operations.

車底監察系統有助打擊邊境偷渡及走私活動。

The Enhanced Under Vehicle Surveillance System can deter illegal immigrants and smuggling activities at boundary control point.

警方在大型活動的入口處使用X光機以加強會場的保安。

Police use X-ray screening machines at the entrances of major events to enhance security.
